配置文件如下：

```
1 server:
2   port: 8710
3
4 spring:
5   application:
6     name: xzl-config
7   cloud:
8     consul:
9       host: 192.168.100.150
10      port: 8500
11      discovery:
12        register-health-check: false
13      config:
14        server:
15          git:
16            uri: https://github.com/JorkeMoon/xzl-config
17            search-paths: beg
18            username: JorkeMoon
19            password: wjorke24
20            label: master
21
22      security:
```

```
23 user:
24 name: xzlggroup
25 password: xzlggroup
```

启动成功后

打开网页，由于使用了security，所以需要输入用户名密码

打开后显示这样，说明可以获取配置文件了

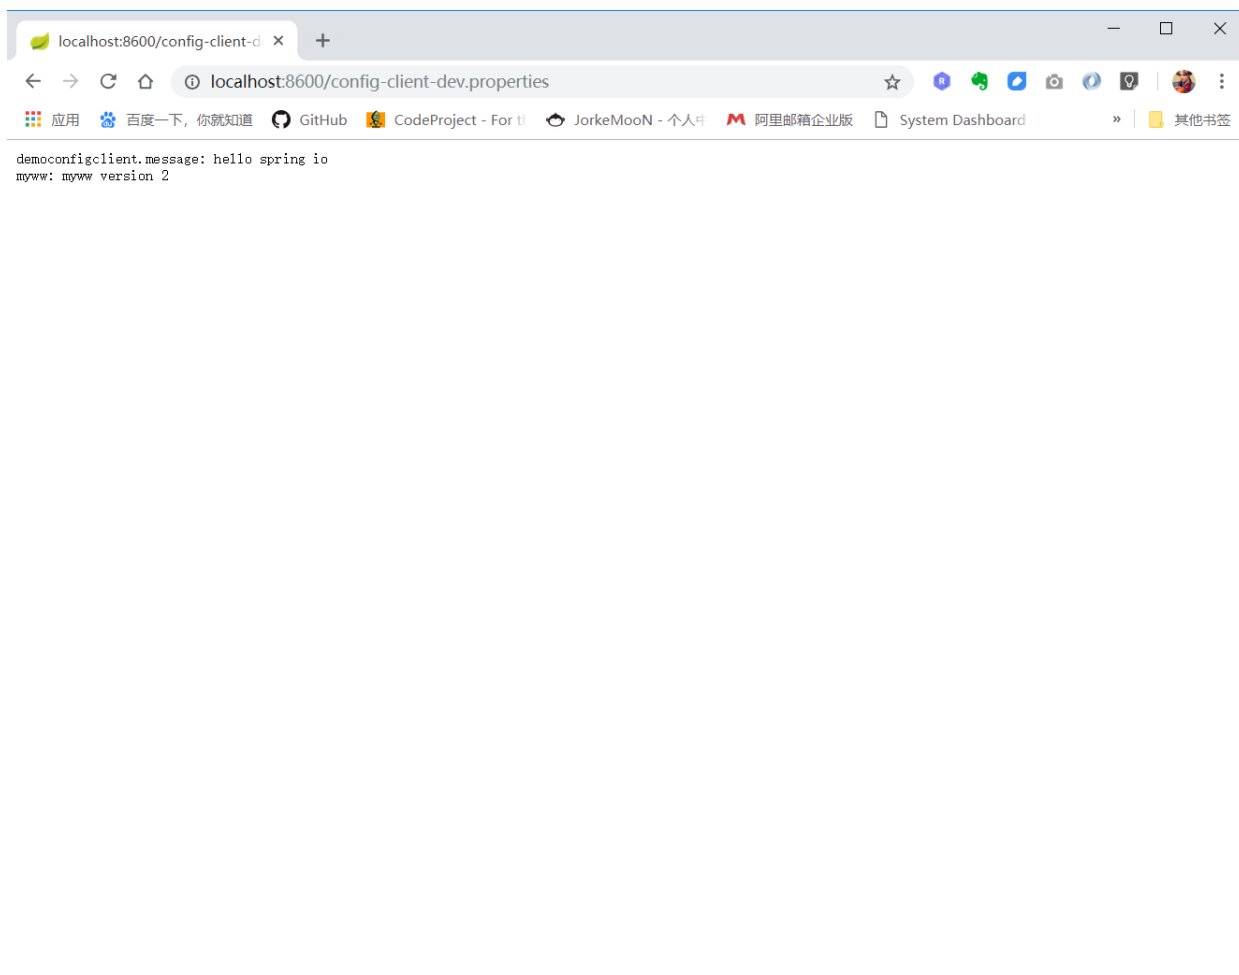

localhost:8600/config-client/d × +

localhost:8600/config-client/dev

应用 百度一下, 你就知道 GitHub CodeProject - For ti JorkeMooN - 个人阿里邮箱企业版 System Dashboard Projects · Dashboar 其他书签

```
{
  name: "config-client",
  - profiles: [
    "dev"
  ],
  label: null,
  version: "38bd83c975164ec6f1ce10343fe346c0022db3fa",
  state: null,
  - propertySources: [
    - {
